**Once service is restored, you may experience discoloured water** coming from your tap. If this happens, we suggest you try the following:

- remove the tap aerators off your taps and flush all the house lines until the water runs clear.
- flush out your hot water tanks. This is to remove the accumulated iron that precipitates out in the tank; this iron may also decrease the efficiency of your water tank.

Should your water continue to be discoloured, please contact the Ontario Clean Water Agency at the number below.
